

KISHAN P HALAGERI

📞 +91-8105533247 | ✉ kishanhalageri@gmail.com | 🌐 kishan-p-halageri | 🏠 kishanhalageri-ai | Bengaluru, Karnataka, India

Professional Summary

Computer Science Engineering (Artificial Intelligence) student with strong fundamentals in Python, machine learning, computer networking, operating systems, and IT security. Google-certified in IT Support (5-course professional certificate). Hands-on experience building ML models with 94%+ accuracy and developing AI-powered systems. Seeking internship or entry-level roles in AI, Data Analysis, or IT Support.

Education

Jain University <i>B.Tech – Computer Science and Engineering (Artificial Intelligence)</i> – GPA: 7.4/10	Bengaluru, Karnataka 2023 – 2027
Alvas Pre-University College, Moodbidri <i>Class XII (Science) – 82%</i>	Dakshina Kannada 2023
Sri Sathya Sai Loka Seva High School, Alike <i>Class X (SSLC) – 80%</i>	Dakshina Kannada 2021

Technical Skills

Languages: Python, C
Machine Learning: Logistic Regression, Random Forest, NLP, Supervised Learning
Data Tools: NumPy, Pandas, Matplotlib
IT & Networking: Networking, Operating Systems, System Administration, DBMS, OOPS
Web Technologies: HTML, CSS
Tools & Platforms: GitHub, VS Code, Google Colab

Projects

AI-Based Fraud Detection in Credit Card Transactions <i>Python, Scikit-learn, Pandas</i> – Developed ML models on 300,000+ transaction dataset with end-to-end preprocessing and feature engineering – Achieved 94%+ accuracy using Logistic Regression and Random Forest; evaluated via precision, recall, and F1-score	2024
Fake News Detection System <i>Python, NLP, Scikit-learn</i> – Built supervised ML classifier using TF-IDF vectorization, tokenization, and stop-word removal to detect fake news – Implemented full NLP pipeline with data cleaning and model evaluation achieving strong validation accuracy	2024
Next-Gen Autonomous Driving <i>Python, CNN, TensorFlow, Udacity Simulator</i> – Built behavioral cloning model using NVIDIA DAVE-2-inspired CNN on Udacity Self-Driving Car Simulator; achieved real-time autonomous navigation via socket communication – Processed 3-camera inputs with data augmentation; trained 5-conv + 4-dense layer network on 66×200 YUV frames minimizing steering MSE with Adam optimizer – Incorporated sensor fusion (Camera, LiDAR, Radar, GPS+IMU) and path planning concepts (A*, MPC, PID)	2025

Certifications

Google IT Support Professional Certificate – 5 courses: Technical Support, Networking, OS, Sysadmin, IT Security | Coursera, Sep 2024 | Verify
Operating Systems and You: Becoming a Power User | Google – Coursera, Sep 2024 | Verify
Introduction to Graph Theory | University of California San Diego – Coursera, 2024

Achievements

- AME CET 2023**
- All India Rank (AIR): **2533**
 - Qualified with **15% Scholarship**
